EDUCATION

Bachelor's Degree in Information System

Telkom University Jakarta

Expected Graduation 2027

Current GPA: 3.71 / 4.00 (Semesters 1–5)

Relevant Courses: Database, Industrial Statistics, Data Mining, Data Warehouse and Business Intelligence, Project Management, Information System Design Analysis

EXPERIENCE

Head of Research and Technology Department

Himpunan Mahasiswa Sistem Informasi

January 2026 – Present

- Led and coordinated the strategic planning and execution of all Research and Technology Department programs to ensure alignment with the organization's technological advancement goals.
- Supervised a dedicated team of members by implementing clear task delegation and performance monitoring to guarantee all project milestones were met on schedule.
- Directed the end-to-end lifecycle of departmental initiatives from initial conceptualization and resource planning to final impact evaluation and reporting.
- Optimized departmental workflows by managing complex schedules, setting high-level priorities, and distributing technical responsibilities based on individual team strengths.

Practicum Assistant – Data Mining

Telkom University Jakarta

February 2026 – Present

- Facilitated engaging lab sessions and hands-on workshops for 40 students, facilitating effective communication and knowledge exchange.
- Coordinated with fellow assistants and faculty to update, organize, create, and improve practicum materials, ensuring they matched current Java development standards and teaching methods.
- Mentored students in applying data mining workflows (such as data preprocessing, clustering, and classification) to real-world datasets, providing technical troubleshooting and conceptual guidance.
- Managed and maintained computer laboratory infrastructure, tested materials, and ensured the hardware/software was secured

Liaison Officer – PKKMB Telkom University Jakarta

Telkom University Jakarta

July 2025 – September 2025

- Facilitated administrative requirements and documentation for over 20 new students to ensure a seamless transition into the university environment.
- Resolved real-time logistical challenges and student inquiries during orientation sessions to maintain the event schedule and student engagement.
- Monitored student participation and well-being throughout the orientation period to ensure a safe and inclusive environment for all attendees.

Event Director – WebVenture Workshop

Telkom University Jakarta

Maret 2025 – Mei 2025

- Led and coordinated a team of 25+ committee members across event, publication, logistics, and consumption divisions to ensure smooth event execution.
- Directed the planning and implementation of an interactive workshop for 39 participants, focusing on digital skill development and teamwork.
- Arranged workshop materials in coordination with external partners and vendors, making sure that all parties involved had clear communications.

Practicum Assistant – Introduction to Information Systems and Object-Oriented Programming

Telkom University Jakarta

September 2024 – June 2025

- Led engaging lab sessions and hands-on workshops for 40 students, facilitating effective communication and knowledge exchange.
- Collaborated with fellow assistants to update student data, create assignments, and discuss key topics such as MS Word, Excel, Canva, OOP, and Java GUI.

PROJECTS

Credit-risk-decision-system | Python, XGBoost, SMOTE, SHAP

May 2026

- Achieved a 99% recall rate to ensure nearly all high-risk credit applicants were successfully identified.
- Reduced false positive cases by 94% compared to the baseline model to minimize the incorrect rejection of creditworthy customers.
- Engineered custom features like work-life ratio and income per capita to capture deeper financial stability metrics.
- Utilized SHAP explainability to validate that employment stability is a more significant predictor of default than raw income.

BookEd | Information UI/UX Design Competition Top 11 Finalist

September 2025

- Directed the end-to-end design and prototyping of a mobile application in Figma to create a high-fidelity and visually compelling user experience.
- Collaborated with a team to transform user research and competitive analysis of digital library services into a functional design strategy.
- Developed interactive prototypes and a detailed design system for the book rental platform to ensure visual consistency and intuitive navigation across all app screens.

Puskita Website | Project Management Course

December 2024

- Executed project tasks within a team by following a RACI matrix to ensure everyone knew their responsibilities across five project phases.
- Supported the creation of the Project Charter and Scope Plan to match high-level goals with final project requirements.
- Analyzed project costs and budget data based on a plan that flagged any spending over a 10% limit.
- Evaluated potential project risks to help build a master list using a probability and impact scale.
- Secured the project stayed on track by following change request rules and helping with progress reports.

SKILLS

- Core Skills: Speaking, Teaching, Leadership & Mentorship, Organization & Planning
- Tools: Python, Google Colab, Power BI, Looker Studio, Figma, Microsoft Office (Word, Excel, PowerPoint)

CERTIFICATIONS

- Data Analytics - Information Technology Specialist
- Google Data-Driven Decision Making Specialization - Google
- Python for Data Science - Udemy
- Microsoft Power BI for Beginners & Excel Users -Udemy
- Responsive Web Design - freeCodeCamp
